

Molded tubes

Thermofixed molded tubes made of PA12 or PUR

Properties

- Fast installation, already possible with connecting elements
- Very complex geometries possible
- Individual 2D or 3D geometry
- Very tight bending radii possible
- Installation markings on the pipe possible
- Low dead weight
- No corrosion

Applications

- Control lines, Air suspension systems and Clutch lines in cars
- Media-carrying lines in the truck area
- Coolant tubes
- Guide tubes for Bowden cables
- everywhere in compact installation situations

We offer you:

- Decades of experience in the field of thermofixing
- Different base plastics, depending on requirements
- Good value for money
- Molded tubes with markings
- Molded tubes with connection systems
- Complete assemblies and In-house mold construction for test gauges

Your benefit:

- Reduction of costs
- Reduction of leakage sources
- Reduction of aids
- Faster assembly
- Reproducible processes during on-site assembly

**We would be happy to advise you on your individual installation. Try us!
Use the „everything from one source“ service from PIOFLEX!**
